EXPERIENCE

Graduate Engineer

December 2019 – Present

Qualitest, supporting Google || Austin, TX

- Understood and edited a large codebase to develop customer-facing features for Google Search and increase user engagement through A/B testing
- Built QA automation tools implementing Google Sheets, Python3, and GScript with the goal of 100% automation and reduction of regression test cycles
- Generated >100 detailed reports covering analysis of key data and outlining potential solutions
- Piloted and incubated 3 high impact projects with a goal of scaling up to over 30 locales
- Clearly and concisely presented weekly reports to stakeholders and project managers
- Trained >5 new team members on analytical and data validation skills to increase support and productivity
- Served as the point of contact for all projects within the Unified Media Platform team
- Transformed existing processes and procedures through automation and detailed guidelines to align with strategic goals

Freelance Web Developer

October 2020 – Present

Ospi Restaurant || Venice, CA

- Trained 3 high-level executives on internal web functions, including steps on how to independently make minor updates and changes
- Fixed bugs from existing website and implement enhancements that significantly improve website functionality
- Designed and implemented >10 time-sensitive graphics for upcoming events and promotions

IT Desktop Support

April 2019 – August 2019

California National Primate Research Center || Davis, CA

- Provided support for IT products and services such as answering questions, troubleshooting problems, instructing customers regarding software or hardware functionality, and communicating IT policy
- Wrote a feature in Java that will convert csv files to json files from a database system
