## EXPERIENCE

### Graduate Engineer

December 2019 – Present

*Qualitest, supporting Google | Austin, TX*

- Understand and edit a large codebase to develop customer-facing features of Google Search and increase user engagement through A/B testing
- Build QA automation tools implementing Google Sheets, Python3, and GScript with the goal of 100% automation and reduction of regression test cycles
- Improve recall and precision for Search features on Google Philippines, an underdeveloped search platform, through loss and root cause analyses
- Generate detailed reports covering analysis of key data and outlining potential solutions
- Pilot and incubate high impact projects with a goal of scaling up to >30 locales
- Clearly and concisely presented weekly reports to stakeholders and project managers
- Trained new team members on analytical and data validation skills to increase support and productivity
- Served as the point of contact for all projects within the Unified Media Platform team
- Transformed existing processes and procedures through automation and detailed guidelines to align with strategic goals

### Freelance Web Developer

October 2020 – Present

*OSPI Venice | Venice, CA*

- Train high-level executives on internal web functions, including steps on how to independently make minor updates and changes
- Fix bugs from existing website and implement enhancements that significantly improve website functionality
- Design and implement time-sensitive graphics for upcoming events and promotions

### IT Desktop Support

April 2019 – August 2019

*California National Primate Research Center | Davis, CA*

- Provided support for IT products and services such as answering questions, troubleshooting problems, instructing customers regarding software or hardware functionality, and communicating IT policy
- Wrote a feature in Java that will convert csv files to json files from a database system

---
